

# Wi-Fi Function User Manual

This description is applied to Air Conditioners with Wi-Fi function. Please read the manual carefully before using the product and keep it for future reference.

# WiFi Function Instructions

## 1. Preparation for use

1. Power on the air conditioner and ensure that the mobile phone is connected to the 2.4GHz of Wi-Fi network.

2. Make sure the air conditioner, mobile phone, and router are close together.

3. Download, install, and register the app:

(1) Use the mobile phone's browser to scan the QR code, download, and install the "Smart Life." APP.

(2) Use the mobile phone number or a third-party account to log in or register an account following the instructions.

## 2. Choose one of the following methods to connect the device

### Method 1: Auto connection

1.1 Adjust the air conditioner to the power-off state. Use the remote control point to the air conditioner and press and hold the "+" button for 3 seconds. The air conditioner buzzer will beep three times rapidly, entering the "reset device" mode (only required for the first installation or router change).

1.2 Turn on the Wi-Fi and Bluetooth on your mobile phone, then open the homepage of "Smart Life" App.

1.3 After clicking "Add," enter the Wi-Fi information .

1.4 Wait for completion when the screen appears .

## Method 2: Scan QR code for connection

2.1 Click "Scan" on the homepage of the APP.

2.2 Scan the QR code

2.3 After scanning, the screen will display as shown in Figure 6. Click on "Add."

2.4 Follow the instructions on the APP

2.5 When it appears, choose "Fast Flash" or "Slow Flash" and proceed to the next step.

2.6 After entering the network name and password of 2.4GHz Wi-Fi, click "Next," .

P.S: The control page can automatically open after successful network configuration using this two methods above, as shown in Figure 12.

## Notes:

1. Users need to have a wireless router (self-provided). Device configuration may fail when the Wi-Fi signal is weak.
2. To avoid the impact of the metal shielding effect on communication, the distance between the Wi-Fi air conditioner and metal or household appliances should be more than 50cm.
3. Supported devices: Android 4.4 or later operating systems; iOS 9.0 or later operating systems.
4. When configuring the device for the first time, please ensure that the mobile phone and air conditioner are on the same LAN.
5. When using the app software to remotely control the air conditioner on 2G/3G/4G networks, cellular data will be generated.
6. When changing the router password or new router, new network configuration for the device needed.
